

# 64TH AVENUE ELECTRIC PROJECT

## CONSTRUCTION IN YOUR AREA

This map is a graphic and may not show exact locations.

**Construction is expected to begin in the coming weeks and will continue through October 2026.** Schedules are subject to change.

During construction, you may notice:

- Marking of utility lines and utility survey holes
- Road and sidewalk closures with parking restrictions
- Temporary changes to access
- Construction noise
- Work area restoration as weather allows

### Overview

We're upgrading about one mile of electric line in your area in Commerce City, as part of our 64th Avenue Electric Project. We'll work along 64th Avenue between Holly and Quebec streets and will upgrade about 4,700 feet of overhead line and replace 27 power poles. We will also replace some underground electric lines.

Upgrading aging electric infrastructure supports continued delivery of safe and reliable electric service and prepares the system to meet future customer needs. For customers, this means a reduced chance for outages, more resilient infrastructure, reduced wildfire risk, modernized equipment and adaptability for future growth.

### Safety

The safety of the public influences every decision we make. We take a proactive approach by implementing safety measures before, during and after construction, including clear signage, traffic management and routine inspections.
